

## Bio and Statement of Qualifications

### Eric Leu

Eric Leu, Founder and CEO of LeuSys Technologies Inc. As CEO, he is responsible for developing the overall vision, strategy and product road map for the company. LeuSys started at 2007. In 2008, Eric observed that digital signage were in need of an easy-to-use software to consolidate fragmented components. He developed iSeeBoard that brings digital signage to the Internet. Eric has spent more than two years building, tuning, and enhancing the application and core infrastructure of iSeeBoard.

Prior to founding LeuSys, Eric was an Enterprise Application Integration architect at Inovis where he was responsible for developing advanced integration software and services.

Prior to that, Eric was a senior software developer at Harbinger/Peregrine where he was responsible for developing advanced e-commerce software. Prior to that, Eric served in Equifax.

Eric has been working in the IT industry for eighteen years. Eric serves as the Team's Technology & Engineering Consultant. Eric received his MS degree in Computer Sciences from Georgia State University.
